**AESTHETIC ONE-SHADE 4 MM COMPOSITE**

**new**

**COMBINABLE WITH  
VISALYS® BULK FLOW**

# VISALYS® BULK FILL

The packable bulk-fill composite **VISALYS® BULK FILL** was developed for modern, long-lasting posterior restorations. It's carefully selected material combination enables very low water absorption of  $9.8 \mu\text{g}/\text{mm}^3$ , ensuring durable and stable restoration margins.

## KEY ADVANTAGES

- ✓ Very low water absorption for long-lasting restorations
- ✓ Fast and reliable single-layer application up to 4 mm
- ✓ Low shrinkage stress and high abrasion resistance
- ✓ High-gloss polishability and long-lasting aesthetic results
- ✓ Can be combined with **VISALYS® BULK FLOW**

## APPLICATION EXAMPLE

1 Initial situation: suspected caries beneath an older composite restoration on tooth 35.

2 Situation after removal of the old restoration and margin preparation; caries still present.

3 Excavated cavity, rubber dam isolation, placement of a sectional matrix system.

4 Finished and polished restoration on tooth 35.

## INDICATIONS

- ✓ Class I restorations
- ✓ Class II restorations
- ✓ Class III restorations
- ✓ Class V restorations
- ✓ Primary tooth restorations
- ✓ Core build-ups
- ✓ Cavity floor elevation
- ✓ Repair of direct and indirect restorations
- ✓ Splinting / stabilization of teeth

## KEY DATA

Water absorption	<b>9.8 <math>\mu\text{g}/\text{mm}^3</math></b>
Inorganic fillers (by weight)	<b>82%</b>
Depth of cure (20 sec., 1200 mW/cm <sup>2</sup> )	<b>4 mm</b>
Volumetric shrinkage	<b>2.2%</b>
Flexural strength	<b>129 MPa</b>
Radiopacity (aluminum)	<b>2.5 mm Al</b>
